

# Rosengrens AVM maxi

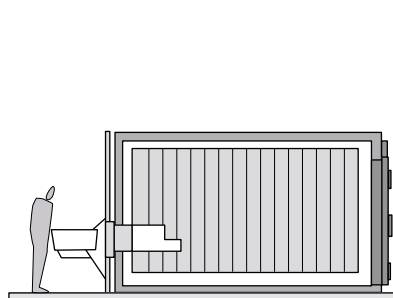

Self service safe deposit locker

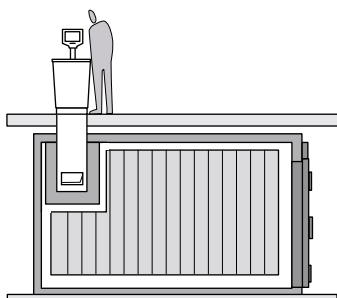

Rosengrens AVM maxi is a fully automated system of robotic safe deposit boxes located in a high security vault. The AVM maxi is a compact, effective and flexible 24h self-service solution. The service room may be located on the same level as the vault or on a floor above. The AVM maxi allows you to offer your customers the most user-friendly and convenient safe deposit locker service possible, while at the same time decreasing the amount of time bank branch employees need to service safe deposit locker customers. The accessibility and convenience of the AVM maxi offers a great competitive advantage making it the simple and secure route to safe deposit boxes for modern banks.

Combination

**Concept:** AVM maxi is a fully automated system of robotic safe deposit boxes with 24 hours availability. It is a compact, effective and flexible solution. The service room may be located on the same level as the vault, on a floor above or a combination of both. Therefore, there is no difficulty in installing the boxes in the basement and having the service room for the box delivery situated in the bank lobby – through the small tower from the AVM maxi. In addition to the safe deposit box service, Rosengrens AVM maxi can function as a transfer safe and deposit of valuables. The intelligent transport system guarantees very short access times. Considering all costs, the functionality and availability of the AVM maxi can give faster pay back than other SDL alternatives, while offering unparalleled convenience, safety and service to your customers.

**Features:** The AVM maxi system is very flexible and suitable for projects to be assembled on site and configured according to customer demands. Different arrangements of the 5 box sizes allow you to customise the unit to your needs. The box delivery points can be situated in the basement, in the lobby or both. The access times are short thanks to simultaneous horizontal and vertical transport of the deposit box.

For smaller installations the AVM mini or AVM midi is available. The user interaction consists of card reader, touch screen and display and as option a biometric reader. The user guidance is very easy operated via a menu and dialogue on the display. The AVM maxi can be administered and controlled via Rosengrens SafeNet monitoring software. Three levels of security with PIN-code, EC-/customer card and key are available. Moreover the following options are available: biometrics, video surveillance and high security electronic lock for the vault.

**Design:** The AVM maxi has a modern and compact design which makes the unit very space saving. Thanks to the innovative and flexible solution, the cassettes are dispensed on the front of the machine in a user-friendly height.

### Product data

|                        |   |
|------------------------|---|
| <b>Connections:</b>    | 230V, 16 A, ca 400 Watt                                     |
| <b>Security level:</b> | EURO V-X EX with system certification depending on location |

### Method of application
