

Rosengrens the European

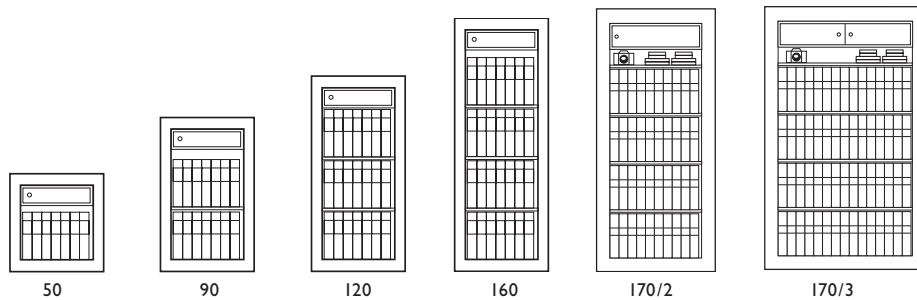

Burglary and fire protection of valuables

The European is a complete range of high graded burglary resistant safes. The whole range is tested and certified according to the demanding European norm EN 1143-1 in Grades II-VI. In addition all safes have a fire protection to withstand a fire for 1 hour. The European range is available in 5 sizes and has a wide range of interior fittings. The safes can also offer a combined storage. By adding a special insert in the safe you are able to store and protect data media such as CD's, DAT cassettes and DLT tapes against fire. As standard all the European models are equipped with Rosengrens key lock RKL-10.

Burglary protection: The European range is tested according to the demanding European norm EN 1143-1 in security Grades II-VI and certified by ECB•S. In Grades III, IV and VI the safes have a supplementary explosive test, which can be ordered as an option.

Fire protection: The European safes are also tested and certified according to LPCB in fire-class 60 P for paper, which means that the safes will withstand a fire for 60 minutes.

Locks: All models are standard equipped with our own unique resettable key lock RKL-10 which has more than 90 million key variation possibilities. The safe can also be equipped with combination lock or electronic lock as options.

Design: The European is attractively finished in off-white and blends in well in both modern and classic surroundings. All the European safes are prepared for floor anchoring.

Quality and environmental management systems: The European series are all manufactured in accordance with the ISO 9001 quality management system and the ISO 14001 environmental management system.

Quality control: The European range has been developed and continuously tested according to the Rosengrens Quality Guidelines which include several criteria relating to existing European norms with the aim of guaranteeing quality and assuring customers that the products live up to the highest expectations.
